

TechniCare
Improving Healthcare

Toilet- shower chair LINA

Compact, movable and clean design

The LINA can be used both as a toilet and shower chair. In close cooperation with healthcare professionals and clients the LINA has been developed.

The LINA can also be used as transport chair to and from the bathroom. The chair can be used with a bedpan, bucket or over the toilet. The LINA has an intended use to be used in healthcare organisations.

We have made the chair out of a combination of powder coated steel and stainless steel. Because of this, we guarantee a long lifespan of the chair.

The foldable arm rests are made out of stainless steel and are provided with soft PUR arm cushions. Also the Seating and back are made out of Soft PUR cushions. The seating and back are removable, so the chair is optimal for cleaning, which improves hygiene in the hospitals and care homes.

We have provided the cushion with a holder for the lid of a bedpan. The seating can be placed both on

front and backwards position, as the client prefers. It is possible to add the foldable and rotatable foot rests.

Advantages

Stainless steel foldable arm rests

Seating, back and arm rest made out of PUR material

Seating and back removable for optimal cleaning.

Easy access for client

Compatible with most lifts

High quality wheels with brakes

Perfect for cleaning

Long lifespan
